

AI Agent Design Canvas

Develop your agent design as you move through the workshop.

1. Teaching Context & Problem Who are your learners? What teaching or learning challenge are you addressing?	2. Student / Teacher / Agent Roles What should the student do? What should the teacher do? What should the agent do?	3. Agent Purpose What should the agent help students do? What should students learn or practice while using it?	4. Agent Behaviors What should the agent do? How should it respond or interact with students?
5. Boundaries What should the agent NOT do? What thinking or work must remain with the student?	6. Knowledge & Resources What information, materials, examples, or course resources would the agent need?	7. Agent Instructions Draft the key instructions that would guide your agent.	8. Test & Revise How would you test the design? What would you change after testing it?
