

Unit 2 Review: Output Validation

Everyone who completes this form by Monday at 10PM will get one extra point on midterm listening exam.

Directions:

This assignment is a little different. In the end, I could not get NotebookLM to make a video that I liked 100%. If you are curious, you can check the notebook chat and see the prompts I was giving it. For this assignment, you can choose any video you want to watch. Choose one video from this [Notebook](#).

While you watch, notice (a) any information that the video correctly states and (b) any information that the video incorrectly states. When you are noticing this information, it can be facts, citations, or points of synthesis. Regarding the latter category, points of synthesis, notice how well—or how poorly—the AI tool can synthesize across sources.

Keep good notes on these two points as you will refer to them later. I will also ask you to upload a copy of your notes.

Tip: You can also listen for any useful phrases for signposting or organizing information that NotebookLM uses. I'll ask you about those too.

Remember: When you are looking for inconsistencies it can be either the AI tool is *wrong* in how it understands the source material or it is *wrong* in how it analyzes across sources. The analysis of sources is a personal, critical thinking skill. Perhaps the AI tool synthesizes sources in a way that you do not find correct. If that is the case, be prepared to tell me why.

Follow the instructions for each question and then type your answer. Click "submit" when you are finished. **You will need to access all the materials from Unit 2 to answer the questions.**

The Utopian Paradox: Why Perfection Fails in Practice

THE ANATOMY OF HISTORICAL COLLAPSE

Communities like Fruitlands and Octagon City collapsed due to mainnutrition, mosquitoes, and dried-up springs.

Escalation to Bioterrorism

The Rajneeshpuram colony infected 751 people with salmonella in the largest bioterrorism attack in U.S. history.

Internal Scandals & External Pressure

Legal battles over public nudity (Home) and rumors of "sex cults" (Helicon Hall) triggered community disintegration.

THE PHILOSOPHICAL MIRAGE

Utopia Literally Means "No Place"

UTOPIA

EUTOPOS (Good Place)

OUTOPOS (No Place)

Thomas More's 1516 pun combines "good place" (eutopos) with "no place" (outopos).

The Reality vs. Pleasure Trade-off

Robert Nozick's "Experience Machine" suggests humans value authentic reality—even with pain—over simulated perfection.

The Unrealizable Ideal

Karl Mannheim argued utopias reflect their era's values but can never be shifting eras.

Unit 2 Review: Output Validation

Find two examples where NotebookLM did **not** correctly synthesize across sources.

For each example, tell me (1) what the mistake was, and then tell me (2) *where* in the original source you found evidence that NotebookLM made a mistake, and finally (3) tell me what the audio overview should have said.

If you think there are no mistakes, you can instead list two examples where NotebookLM did not make mistakes synthesizing across sources.

Example 1

Your answer

Example 2

Unit 2 Review: Output Validation

This is the final section.

Take a minute to think about how NotebookLM organized and delivered the information. Tell me, in your own words, learned about the Unit 1 materials that you did not know before listening to this video.

Your answer

Did you hear any phrases for signposting or organization that you would like to use? Tell me about them in the space below.

Your answer

Please take a copy of your notes and share them with me as a Google Drive link. This can be as a picture or simply pasted into a Google Doc.
